## **ATTENTION: CRANBROOK DRIVE RESIDENTS SOUTH OF HUNTINGTON DRIVE**

### **Road Reconstruction**

Perrin Asphalt Company is scheduled to begin milling and excavating the existing Cranbrook Drive asphalt pavement and subgrade between Milford Drive and Huntington Drive on Wednesday, July 9, 2015.

The depth of the milling and excavation will be 21 inches below the top of the new concrete curb. The milling portion of the work should take 2 days to complete and the excavation should take an additional 2 days to complete.

After the excavation is completed, a 6 inch layer of aggregate base will be placed over the new subgrade followed by a 6 inch layer of asphalt concrete base being placed on top of the aggregate base. This will be followed by a 1¾ inch asphalt concrete intermediate course. The final 1¼ inch asphalt surface course will not be installed until the end of the total roadway reconstruction project from Milford Road south of Huntington Drive to Milford Road north of Huntington Drive.

During the milling, excavating, backfilling with aggregate base and asphalt concrete base and the asphalt paving, automobiles and trucks will not be permitted on the section of Cranbrook Drive south of Huntington Drive to Milford Drive between 7:30 A.M. and 5:00 P.M. We anticipate the work will require a maximum of 10 construction days or two weeks depending on the weather. We will try whenever possible to permit parking on the street during the night between 5:00 P.M. and 7:30 A.M. Vehicles parked on the street between 7:30 A.M. and 5:00 P.M. will be subject to towing.

Vehicles may be parked on Stratford Drive, Coventry Drive, Cambridge Drive, Huntington Drive west of Cranbrook Drive and on Cranbrook Drive north of Huntington Drive during the road reconstruction south of Huntington.

Please call the Village Engineer, Richard Wasosky at (440) 260-1555 or the Village Superintendent of Service, Jason Walters at (330) 760-4944 if you have any questions.
